# Walle Corporation successfully completes installation of PCMC's innovative Fusion C flexographic press

GREEN BAY, Wis. — Dec. 1, 2016 — Paper Converting Machine Company (PCMC), part of Barry-Wehmiller, is eager to announce that the first Fusion C flexographic press has been successfully installed by its customer [Walle Corporation](#), a leading label supplier to the consumer packaged goods industry, located in Winchester, Kentucky.

“Our new Fusion C press will help us fill a previously unmet need,” commented Sean Keeney, President and Chief Executive Officer of Walle Corporation. “We believe it will make an immediate impact in our facility and with our customers.”

The Fusion C is loaded with fast make-ready and waste-saving features, and has a smaller footprint and fewer parts—saving space and cost. Its accessibility and ease of use make the Fusion C a unique offering in the market.

“PCMC has always been very supportive, open and responsive to our needs,” said Keeney. “Our new Fusion C will provide us with the quick changeover, better registration control, and higher speeds and efficiency that we were looking for.”

A worldwide leader in the design and manufacture of inline and CI presses, PCMC also offers customers a commitment to quality and a dedication to service.

“Customers such as Walle Corporation are excellent partners for PCMC, because they recognize that our technology and engineering capabilities are assets to grow their businesses,” said Rich Rogals, Sales Director for PCMC. “Both PCMC and Walle Corporation are aligned for long-term success and growth.”

**Walle Corporation** was founded in 1872, and today, it is a leading label supplier to the consumer packaged goods industry. Family-owned for the past 35 years, the company was the first to offer a broad range of label products and one-source convenience for its customers. For more information, visit [walle.com](http://walle.com).

## ABOUT PAPER CONVERTING MACHINE COMPANY (PCMC)

Paper Converting Machine Company (PCMC) specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, package-printing and envelope-manufacturing industries worldwide. Our comprehensive product offerings include rewinding, laminating, printing, embossing, perforating and packaging equipment for tissue and towels; folding and converting machines; and a complete range of flexographic printing presses, serving the flexible-packaging, prime-label and carton-converting industries.
