

Is your future at PCMC?

Full-time internships in electrical engineering, mechanical engineering, electro-mechanical technology, and more...

Since 1919, Paper Converting Machine Company (PCMC) - located in Green Bay, Wisconsin - has been engineering and building machines that keep businesses running around the globe. From tissue, to nonwovens, flexographic packaging and envelopes, we provide manufacturing solutions that bring our customers' ideas to life.

Fueled by a team of nearly 1,000 professionals around the globe, we're always looking for new talent to join our team. This includes our internship program, which allows a team of college students to gain real-world experience. Whether it's engineering, safety, or a business support role, we offer a wealth of opportunities that will match your area of study.

Are you looking for a place that offers a casual work environment, challenging projects, and a culture where you feel appreciated and valued? If so, PCMC might be for you. But don't take it from us. Here's what a few of our recent interns had to say about their experiences at PCMC.

Alex Dixon
Electrical Engineering
University of Wisconsin-Madison
Electrical Engineering Intern

"I have had two internships with PCMC, and both have been incredible experiences. Everyone at PCMC wants you to succeed and are very willing to share what they know in order to help. During my internships I have learned many new skills and have honed the skills I already possessed. PCMC has given me a great start to my professional career and has set me up to succeed."

Jon McClendon
Risk Control
University of Wisconsin - Stout
Safety Intern

"Being an Intern at PCMC has been a great experience. It helped me really understand what I am studying in school and connect the dots. The biggest thing I have learned and has been the most beneficial is product safety."

Natalie Magnin
Communications Major
University of Wisconsin-Milwaukee
Human Resources Intern

"For my internship I was able to not only utilize but improve my communication skills making it a truly beneficial experience. Being surrounded by employees that want to help you succeed and being able to learn more about the corporate aspect of working with people, has been extremely appreciated. Overall I have felt valued as an intern. I highly recommend an internship with PCMC."

Sam Allcox
Mechanical Engineering
MSOE
Mechanical Engineering Intern

“Working at PCMC was a great experience, I met a lot of friendly people that were willing to help me grow. From the start, I was given a very open ended project that I was able to own. My mentors were there to guide me through the project. Because I was allowed to struggle at times and figure things out on my own, I learned way more than if I was given direct instructions.”

Rachael Strnad
Business
St. Norbert College
Finance Intern

“My experience as an intern is one that I will not forget. I get to experience the business side of things, and I am always learning something new. Everyone at PCMC is so helpful and easy to talk to, like a family. The knowledge I gained at PCMC will help me with my future endeavors. I am so grateful to have been given the opportunity to intern at PCMC.”

Ben Klinger
Mechanical Engineering
Michigan Technological University
Mechanical Engineering Intern

“My internship experience at PCMC has been very fulfilling. From day one I was treated like a regular member of the engineering team and was given meaningful projects that were implemented throughout the company. The employees at PCMC, truly want to build each other to greatness.”

Kenton Grych
Electrical Engineering Technology
UWGB
Electrical Engineering Intern

“During my experience as an intern I was exposed primarily to drafting processes within the tissue converting value stream, working upwards toward developing code for new CAD software and designing converting processes that improved machine intuitiveness for operators. All the engineers provided great feedback and opportunities to learn and develop practical skills.”

Taylor Ross
Mechanical Engineering
University of Wisconsin - Madison
Mechanical Engineering Intern

“PCMC has given me the opportunity to apply what I have learned in school on meaningful projects that will actually be implemented on their machines. They have trusted me and have given me as much responsible freedom as I was comfortable with, but everyone was willing to help any time I asked. The people and the culture at PCMC is unparalleled, and is a great environment to work and learn as an intern.”
