

MACHINE **AUDIT** PROGRAM

RETURN YOUR EQUIPMENT TO LIKE-NEW CONDITION

A PCMC machine audit includes a thorough inspection of a machine's mechanical, electrical and hydraulic systems in both dynamic and static states by a PCMC-trained service technician.

Audit Process

- Dynamic condition: Our service technicians monitor equipment while running production for an overall condition assessment. They review it with your maintenance and operating personnel, to understand the main issues of the machine.
- Static Condition: Take the equipment out of production and review individual sections down to the part level.
- Our service technicians have the machine specific components, assembly drawings and bill of materials on-hand to aid in part number identification.
- You'll receive a complete review of your PCMC equipment by one of our trained service technicians. While onsite, they'll be able to review their findings and discuss and possible upgrades with you.

Audit Results

- After the audit is complete, you'll receive a formal audit report, which highlights problem areas and ranks them by severity.
- Updated part numbers, pricing, lead times and stocking information is included
- Any applicable upgrades or modification packages.

<p>Key Benefits</p>	<ul style="list-style-type: none"> • Return equipment to like new-condition. • Improved performance and reliability. • Maintenance planning: Schedule preventative maintenance before major problems occur. • Budget planning: Recognize replacement parts and possible upgrades. • 6/60 pricing program: Six percent discount on parts purchases from the audit if ordered within 60 days.
<p>Audit Cost</p>	<ul style="list-style-type: none"> • Standard field service rates apply for the service technician's visit, plus expenses. • There is no charge for the parts manual used during the audit, time to prepare the audit report, or follow-up activities.
<p>Contact</p>	<p>For more information or to order an audit, please call Scott Turransky at 920.595.0658 or email scott.turransky@pcmc.com</p>
